

pharmabox24 mini

Your Pharmacy open 24/7

PHARMABOX24 is an automatic retail shop always open that can sell different products of different shapes and dimensions, 24/7.

It is the ideal solution to get the best out of the overtime of the Pharmacy to increase sales and to give a non-stop service to the clientele. With Pharmabox24 you can create an automatic retail shop, indoor and outdoor, without the need of any employees.

The wide window and the high storage capacity ensure an immediate choice and the satisfaction of every requirement of the clientele.

The banknote reader, the coin acceptor change giver, the interactive voice guide system and the big colour monitor guarantee easyness and autonomy in the purchasing for everybody.

Product dimensions:

**Your Pharmacy
open 24/7**

Pharmabox24 can sell any kind of product packed in plastic box, glass, bottle, envelope, carton, metal, aluminium, squared product, rectangular or cylindrical one, fragile or not fragile of any size. The store is totally managed by the Chemist himself who can load whatever he wants thanks to its **high flexibility**. It is extremely easy to set up in order to adapt it to the different volume and packaging of any references.

Pharmabox24, through its **lift**, provides the selected product to the client, protecting fragile or delicate products from crashes.

The **cooling system** and the insulated structure guarantee the right preservation of the products.

In addition to the normal presence of Pharmabox24 within an existing Pharmacy, our kiosk allows the Pharmacist to offer its clientele a **retail service** in non-traditional locations and at not-traditional hours.

Examples of such service could be areas where a full retail presence is not economically viable (seasonal tourist resort, remote town), location of high footfall but limited space (eg. train and tube station, airports, hospital and health centres, gp and dentists surgeries, supermarkets and grocery stores) and naturally 24 hours/7 days a week service.

HOW TO MANAGE PHARMABOX24: every rack is composed by many independent slots. Each of them can be individually set up by the Chemist in height, width and depth. Once the price of the references has been set up, PHARMABOX24 is ready to sell automatically.

HOW TO BUY: Pharmabox24 is very simple to use for everybody. The client just have to type on the keyboard the code of the chosen product. Then he inserts the money (coin, banknote) or the credit card and just after a few seconds the product can be picked up. The money back and a ticket can be immediately collected by the client.
